

The **Scope of Work** in the RFP is hereby revised to the following:

The Borough of Ringwood is seeking written proposals for the lease of up to four locations on its Tower. **The RAD centers of 125'-135', 105'-115', and 80'-90' are currently occupied.** It is the Borough's goal to allow Bidders who currently have equipment on the tower to remain at their existing RAD center provided they submit a qualified bid. The Borough reserves the right to award an existing RAD Center to the Bidder currently occupying it, even if another Bidder submits a higher bid.

The RAD centers for 115'-125' and 95'-105' are available but the winning bidder would need to remove abandoned antennas and equipment at those rad centers as part of the award.
